

PRESS RELEASE**"Li Shurui: Exceeding Size..."****2005.10.23 - 11.9****Long March Independent Space, Beijing**

"Exceeding Size..." is a proposal that I had let lie for the past year. With generous support from the Long March Space, this work will finally be presented here for the next two weeks. This exhibition will be followed by exhibitions by my friends Hu Liu, Tang Yi, and Chen Jiechu.

The three works presented are the most exquisite works I have produced to date. The materials used are textile and plexi-glass, and the simple structure and small size enable you to view the work in its entirety from the doorstep. The works are very much like some life-form meaninglessly reproducing themselves inside the glass mantles, but also a materialization of extreme simplicity in my own aesthetic viewpoint. I hope to represent a transforming scene to show how reproducing and replicating become a part of physiological process.
