

PRESS RELEASE

"Long March Space Independent Project: Magnetic Erasure Space"

Qiu Zhijie, Li Lipeng

2006.7.23

Long March Independent Space, Beijing

What do we take with us when we head out? Where do we dare not to go? We lose, because we have once owned. We will be forgotten, because we have once been remembered. We live a busy, substantial, doubtless, but anxious life, identified by numbers, symbols, channels and locations. We are always trying to avoid a certain place, one that could hurt us who are modern. Like a pawn waiting to be taken. Magnetic Erasure Space is a restricted area. Magnetic Erasure Space is a space of leisure. Magnetic Erasure Space has something to do with Fengshui.
